

Examine Life Expectancy

Richard Ressler

2020-06-29

```
library(tidyverse)
library(gapminder)
```

Abstract

Here, I re-examine the analysis of Oeppen and Vaupel (2002).

Life Expectancy Analysis

```
gm_data <- gapminder_unfiltered

# This will summarize the data

gm_data %>%
  group_by(year) %>%
  filter(lifeExp == max(lifeExp)) %>%
  ungroup() %>%
  select(year, country, lifeExp) %>%
  arrange(year) -> results
```
